

*For your scientific
and industrial
projects*

LET'S WORK TOGETHER

Partnership

From the idea to the implementation, CRYOSCAN accompanies you in realising your scientific and industrial projects in the fields of vacuum, ultra-high vacuum and cryogenics. From the world of research, the CRYOSCAN team wants to share its experience and specific skills in your technology upgrading and transfer projects.

Submit us your projects, we will work together to make the link between the laboratory and the scientific instrumentation market.

Different contractual frameworks are possible:

- Collaborative projects
- Know-how licence
- ANR Projects
- LABCOM
- European grant
- ...

CRYOSCAN, partner of your industrial and scientific projects

Help with R&D

ENHANCE YOUR POTENTIAL

Help with Research & Development (R&D)

CRYOSCAN accompanies you in your scientific equipment acquisition projects. Our Scientists and Consulting Engineers provide you scientific and technical expertise at all stages of your projects and intervene in the different phases:

- **Definition of the specifications of a complete device**
The experience of our researchers will allow you to benefit from specifications in line with your current and future needs.
- **Choice/dimensioning of the components of your system**
The integration of components is delicate, the equipment must be compatible with your system and correctly sized. Be assured of having the optimum solution for your measuring instrument.
- **Implementation monitoring of your experimental device**
The purchase of a machine is time consuming; save time by entrusting the monitoring and putting in place of your device to CRYOSCAN.

Your project worry-free

Co-financed by the European Union within the framework of the ERDF-FSE operational program of Lorraine and Massif des Vosges 2014-2020.
